

DOCUNIFY is a growing Admintech-company awarded by FEDIL “**Innovative Start-up of the year**”.

DOCUNIFY offers to its clients a secured and paperless collaborative platform and is currently seeking a **Junior JavaScript Full-Stack Developer** to join its developers’ team and to grow the functionalities of its platform.

On a daily basis, you’ll get to play with:

- AngularJs and Angular
- HTML5, CSS3, LESS / Sass
- REST Apis
- Node.js, Express, Mocha
- MongoDB
- Docker, Jenkins, Prometheus and Cloud Infrastructure
- Github, CI / CD, Cypress, WebStorm, YouTrack ...

You’ll have the chance to show off your skills across multiple modules, ranging from Web applications and Hybrid Mobile applications, to DevOps configurations over the Azure Cloud and Electronic Signature components.

You’ll have the opportunity to contribute to the software that propels the company forward as well as sharpening your skills on different technologies. If you love coding in JavaScript and creating great User Experience, then we have to meet.

About you

You have graduated from a CS degree / Bootcamp and ideally you have some real-world production experience working as part of a team.

You love staying on the cutting edge of the Software Engineering stack and aren’t afraid of moving quickly and breaking some eggs. Your thirst for knowledge is continuously growing and doesn’t show any sign of slowing down.

You love writing reusable, testable and efficient code and think that a team grows and improves by sharing knowledge and experiences. You’re convinced that Agile is a mind-set and not another step-by-step project management methodology.

Last but not least, you’re a team player and enjoy working with great colleagues in a relaxed atmosphere, with easily accessible offices, close to the Belgian border in Rombach-Martelange (Luxembourg).

Ideal candidate skills

-) Proficient knowledge of HTML and CSS3
-) JavaScript experience and frameworks such as Angular, React or Vue
-) Back-end development experience (e.g. Node.js, Java, Python, ...)
-) Pragmatic experience with databases (SQL / NoSql)
-) RESTful API design and implementation
-) Git and GitHub master

Bonus skills

-) UX / UI
-) CSS pre-processors (LESS or SASS)
-) MongoDB
-) Docker
-) WebRTC
-) Ionic, ReactNative, NativeScript
-) CI/CD, DevOps, Cloud
-) Java, Python, PHP

Are you ready to join our digital and fully collaborative world, and working on a day-to-day basis to propose new collaboration tools to all our customers?

If you think you are the person we are looking for, please send us your CV to RH@docunify.com (<https://docunify.com/privacy-policy/>)
